2022 SC Awards Finalists: Best Enterprise Security Solution

May 16, 2022

Certain tools and services from all product sectors are designed to meet the requirements of large enterprises, whether it be scale, hybrid environments, global regulatory compliance, to name only a few.

Solutions recognized in this category help large organizations manage the extensive requirements tied to ensuring a plethora of systems, applications and networks remain protected.

Click here to see our full list of 2022 SC Award finalists.
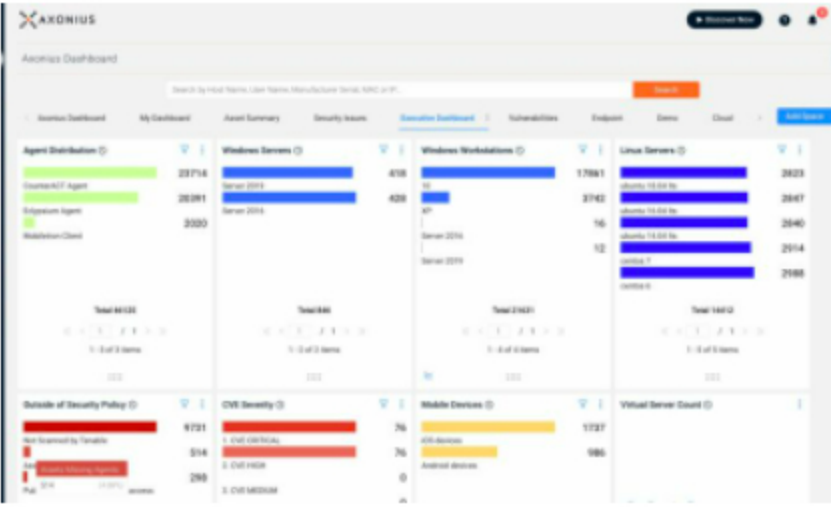

THE TOP 5 | BEST ENTERPRISE SECURITY SOLUTION

ENTERPRISE SECURITY SOLUTION

SD Elements

Security Compass

With SD Elements, customers benefit from an 80% reduction time in threat modeling, and a 90% reduction in risk assessment time, effectively managing and mitigating risk without compromising speed. The platform automates proactive threat modeling, secure development, and compliance processes, and guides application security professionals and developers through every step required for secure software development.

ENTERPRISE SECURITY SOLUTION

Axonius Cybersecurity Asset Management

Axonius

Axonius is the only platform to provide organizations with complete visibility and automated policy validation on all assets, devices, and users. The platform offers unique features, such as the ability to turn customized, technical queries into regular alerts, not only saving customers time and effort, but also improving ROI for other solutions. The platform's seamless deployment and ability to provide immediate visibility into assets also make it a powerful tool during M&A.

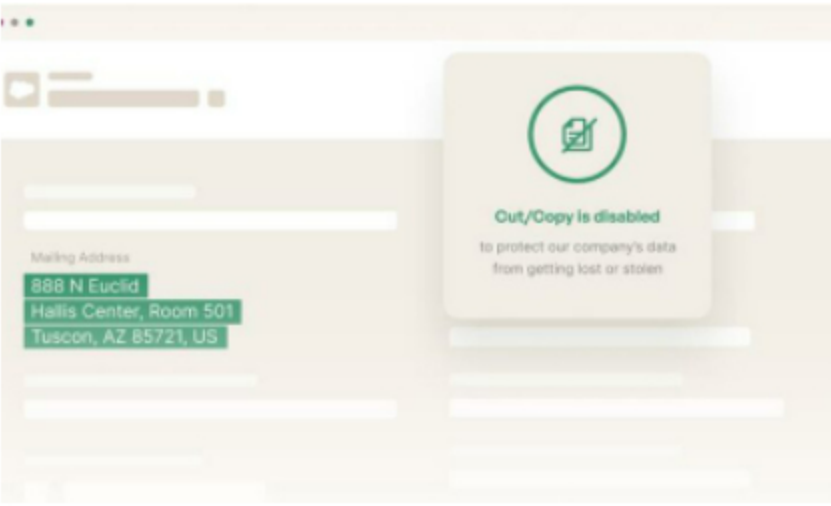

ENTERPRISE SECURITY SOLUTION

Proofpoint Threat Protection Platform – Enterprise Security Solution

Proofpoint

Proofpoint's platform reduces risk and operational impact, and provides visibility to customers. Internal metrics show an average efficacy above 99.999% and less than 1 in 4 million messages being false positives. Proofpoint's SaaS-based approach reduces configuration & management of resources, and ensures scale.

ENTERPRISE SECURITY SOLUTION

The Enterprise Browser – Enterprise Security Solution

Island

Island's Enterprise Browser provides customers with built-in security anytime, anywhere, to any device, on any platform. While the Enterprise Browser touches all areas of enterprise work, its Chromium-based design means that end users have the exact same experience they are accustomed to while their organizations gain significant security and productivity improvements.

ENTERPRISE SECURITY SOLUTION

Swimlane SOAR

Swimlane

Swimlane offers a robust and integrative SOAR platform that automates detection, response and investigation protocols and allows for complete visibility into IT ecosystems with the ability to comprehend and thwart malicious threats in real-time before cybercriminals are able to take over.
