# SWIMLANE

5 Tips to Build an Automated SOC

Learn key insights and proven strategies from the Swimlane SOC team on successfully implementing Turbine.

1

Select the right partner

Identify partners and technologies that fit your unique business needs.

2

Start with quick wins

Focus on straightforward, high-volume use cases that give you quick results and reduce the noise.
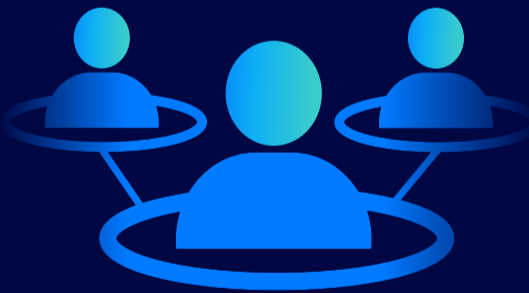

3

Focus on continuous improvement

Focus on progress, not perfection: Prioritize getting things done, and come back later to refine and improve.

4

Invest in Team Development

A low-code platform with proper onboarding ensures all team members automate successfully.

5

Establish a long-term strategy

Choose scalable tools that can handle increasing complexity and capacity as your needs increase or change.
