

Swimlane Turbine Enterprise Action-Based Pricing Model

Maximize your SecOps ROI with a comprehensive agentic AI automation platform built to scale alongside your needs.

Gain access to the Swimlane Turbine agentic AI automation platform without hidden costs for features or capabilities. Our pricing follows a tiered model broken down by the daily average number of actions automated. We are all about action, not consumption, so you'll only pay for the work that Turbine does on your behalf. User-based pricing options are also available. Contact your Swimlane representative for more information about this option.

All Tiers Include

- ✓ Swimlane SOC Automation Solution
- ✓ Case management
- ✓ Dashboards & reporting
- ✓ Unlimited active playbooks
- ✓ Infinite integrations
- ✓ Agentic & generative AI
- ✓ Unlimited remote agents
- ✓ Unlimited tenants
- ✓ Marketplace of AI automation actions
- ✓ Full administrative security & compliance control

TAM	2 hours/week	2 hours/week	2 hours/week	5 hours/week	5 hours/week
Implementation	1 week implementation time	1 week implementation time	2 weeks implementation time	3 weeks implementation time	4 weeks implementation time

What is an Action?

To put it simply, an action is anything that we automate on your behalf, which is visually represented by a rectangle (otherwise known as a component) on a fully-expanded playbook. Some common examples of actions include:

- Connector actions
- Data transformations
- Record update
- Calling another component
- Hero AI action

Triggers do not count as an action.

24/7 Security Coverage

We value your security. If your average daily actions automated exceed your licensing plan, Turbine will continue to process playbooks without interruption. We will never stop an action from running.

Swimlane Hero AI Capabilities and Value

Hero AI prompts are included for all Turbine customers. If a customer does not want Hero AI, it can be disabled for their entire account.

Customers who adopt Hero AI can improve their efficiency by 20% or more, surpassing the benefits of automation alone. Generalized return on investment estimates are outlined below. Get a personalized ROI estimate at swimlane.com/roi-calculator.

Hero AI	Productivity Gains	Return on Investment
100 prompts/day	+2 SOC Analysts	\$208,333
250 prompts/day	+5 SOC Analysts	\$520,833
500 prompts/day	+10 SOC Analysts	\$1,041,666
1000 prompts/day	+20 SOC Analysts	\$2,083,333
