

Microsoft Defender endpoint security

AI-powered, industry-leading endpoint detection and response across all platforms.

Secure your device estate using AI-powered, industry-leading endpoint detection and response across all platforms, devices, and IoT with Microsoft Defender. Built on the industry's broadest threat intelligence informed by more than 100 trillion daily signals and 10,000 security experts, it empowers security teams to fend off sophisticated threats. Bolster your posture with unified endpoint settings management across security and IT teams and applying prioritized best-practice guidance to minimize vulnerabilities. Outmaneuver adversaries with industry-transforming AI that terminates ransomware early in the kill chain and enables analysts to move at machine speed. With Microsoft Defender endpoint security, you stay one step ahead of the evolving threat landscape.

How Swimlane Turbine integrates with Microsoft Defender

Swimlane Turbine easily integrates with Microsoft Defender endpoint security via a connector available in the [Swimlane Marketplace](#), facilitating real-time threat detection and response. This integration allows users to automate and streamline security workflows, executing critical actions like alert creation, machine isolation, and threat investigation directly within the platform, significantly enhancing incident response capabilities.

Customer Benefits

- **Accelerated Threat Response:** Initiate automated investigations and remediation actions within Microsoft Defender (e.g., isolating devices, deleting emails) directly from Turbine playbooks for faster mitigation.
- **Cross-Domain Intelligence:** Correlate alerts across different Microsoft Defender components to provide a holistic view of sophisticated attacks affecting multiple domains.
- **High ROI and Efficiency:** Achieve 240% ROI in year one and build robust playbooks 3x faster, accelerating time-to-value for Microsoft security investments.
