

Certification Program

Develop the critical skills necessary to mitigate threats and respond to incidents more efficiently.

Highlights

- Instructor-led, online and e-learning courses with hands-on lab exercises.
- Courses available worldwide.
- Instructors are seasoned cybersecurity professionals with real-world, frontline experience.
- Participants learn SOAR best practices by configuring, deploying and maintaining Swimlane.
- Teams are able to see the possibilities of automating and orchestrating their security environment.
- Classes and exercises are based on real-world threat investigations and remediation.

Our industry-leading professional SOAR certifications help validate your technical competencies and knowledge of Swimlane.

Every organization has different processes, people and technologies. Our training and certification program is designed to help you understand how to use Swimlane in your environment most effectively. Ultimately, having a stronger understanding of the security orchestration, automation and response (SOAR) tool means you'll realize a faster return on your investment with an ability to respond to attacks more quickly and efficiently.

The Swimlane Certification Program is a multi-tier certification program, including training and certifications for Swimlane users, administrators and developers. Validate your technical knowledge and competency by completing a certification based on your specific area of Swimlane expertise.

About Swimlane

Swimlane is at the forefront of the growing market of security orchestration, automation and response (SOAR) solutions and was founded to deliver scalable and flexible security solutions to organizations struggling with alert fatigue, vendor proliferation and chronic staffing shortages. Swimlane's solution helps organizations address all security operations (SecOps) needs, including prioritizing alerts, orchestrating tools and automating the remediation of threats—improving performance across the entire organization. Swimlane is headquartered in Denver, Colorado with operations throughout North America and Europe. To learn more about Swimlane, visit www.Swimlane.com.

Swimlane Certified SOAR User (SCSU)

Who: A Swimlane Certified SOAR User (SCSU) possesses the knowledge to interact with Swimlane records, reports and dashboards to resolve security alerts quickly.

What: Online course that provides end-users with an overview of interacting with Swimlane records, reports and dashboards.

Benefits: SCSU certification validates your knowledge of security orchestration, automation and response (SOAR).

Exam Format: Online exam

Swimlane Certified SOAR Administrator (SCSA)

Who: A Swimlane Certified SOAR Administrator (SCSA) can implement SOAR use cases and manage the Swimlane platform.

What: Instructor-led training with hands-on practicals that teach students how to install and configure the Swimlane platform, deploy and configure Swimlane applications and workflows, configure integrations, implement RBAC, and build reports and dashboards.

Benefits: SCSA certification validates your ability to configure the central features of Swimlane and effectively deploy SOAR use cases.

Exam Format: Online exam

Swimlane Certified SOAR Developer (SCSD)

Who: A Swimlane Certified SOAR Developer (SCSD) has basic coding knowledge in Python and JavaScript and can develop and deploy custom content in Swimlane.

What: Instructor-led training with hands-on practicals that teach students how to develop and deploy custom content, to include integrations and widgets. To be eligible for the developer certification, individuals must have completed the SCSA certification previously.

Benefits: SCSD certification validates your knowledge of developing custom content within the Swimlane SOAR platform, ensuring your ability to make use of its full functionality to orchestrate and automate the incident response process.

Exam Format: Online exam
