

Turbine Hero AI

The Ultimate SecOps Companion

Maximize SecOps Effectiveness and Accountability

Hero AI is a collection of artificial intelligence (AI) innovations available in Swimlane Turbine. It combines human and machine intelligence to optimize Security Operations (SecOps) and maximize return on investment. With Swimlane’s combination of of generative AI, automation, and low-code technology security operations center (SOC) teams elevate productivity to new levels.

240%

TAG Cyber Reveals

Enterprises achieve 240% return on investment with Swimlane Turbine.

25 Seconds

Python Script Generation

Hero AI Text-to-Code ChatBot generates complex scripts in seconds.

1 Day

Time To Value

It only takes 1 day to be up and running with Swimlane Turbine.

Hero AI Innovations

Hero AI is a collection of artificial intelligence (AI) innovations available in Swimlane Turbine. It combines human and machine intelligence to optimize Security Operations (SecOps) and maximize return on investment. With Swimlane’s combination of of generative AI, automation, and low-code technology security operations center (SOC) teams elevate productivity to new levels.

Proprietary and Private LLM

Swimlane developed its own proprietary and private Large Language Model (LLM) to ensure that all Turbine solutions can be AI-augmented while all data is kept private and secure.

Crafted AI Prompts

Hero AI Crafted Prompts enables customers to leverage data in alerts, cases, intelligence, and automation pipelines. They can select from a range of LLM and apply AI throughout any workflow.

AI Case Summarization

Hero AI Case Summarization is an intuitive tool that uses Swimlane's proprietary LLM to categorize and prioritize issues more efficiently. Analysts can quickly and seamlessly understand even the most intricate cases, alerts, and intelligence.

Schema Inference

Hero AI Schema Inference is an intelligent testing and curation tool that allows users to gain complete insight into a data source for any action, streamlining access and empowering analysts to build robust and efficient playbooks with ease.

AI-Driven ChatBots

Hero AI is a collection of artificial intelligence (AI) innovations available in Swimlane Turbine. It combines human and machine intelligence to optimize Security Operations (SecOps) and maximize return on investment. With Swimlane's combination of generative AI, automation, and low-code technology security operations center (SOC) teams elevate productivity to new levels.

Text-to-Code

The Text-to-Code ChatBot acts as a one-stop scripting assistant to generate complex scripts. Powered by OpenAI, it generates Python outputs and executes test actions directly within Turbine Canvas. This ChatBot helps to create powerful playbooks with advanced logic in mere seconds.

HelpDocs Query

The HelpDocs Query gives instant answers when and where needed. This AI-powered ChatBot is trained on the Turbine Platform documentation to provide immediate support for questions.

Unlock the full potential of automation with Swimlane Turbine

Ready to experience the transformative capabilities of Swimlane Turbine? Request a demo at swimlane.com/demo

Swimlane is the leader in AI-enabled, low-code security automation. Swimlane unifies security operations in-and-beyond the SOC into a single system of record to reduce process and data fatigue while quantifying business value and security effectiveness. The cloud-scale Turbine platform combines human and machine data into actionable intelligence for security leaders. For more information, visit swimlane.com
