

# Swimlane Turbine for Mergers and Acquisitions

Leverage the power of AI automation to integrate and secure your environment during and after M&As.

Mergers and acquisitions (M&A) are core to many organizations' growth strategies, but they are not without data security risk. During an M&A, cybersecurity teams are left to grapple with many challenges on top of day-to-day security operations (SecOps), such as an increased attack surface, siloed or incompatible security tools, an evolving regulatory compliance landscape, a heightened vulnerability period, and struggles to merge operational processes.

To ensure secure growth, CISOs need a proactive and scalable security strategy for M&A's. Swimlane Turbine, the AI automation platform, offers flexible solutions to multiply the force of security teams to prevent breaches and ensure compliance during and after M&As.

## AI AUTOMATION BENEFITS DURING M&A

Integrate disparate cybersecurity tools

Merge and streamline SecOps processes

Unify compliance audit requirements

Prioritize vulnerabilities across multiple scanning tools

Optimize the cost-effectiveness of various SecOps investments

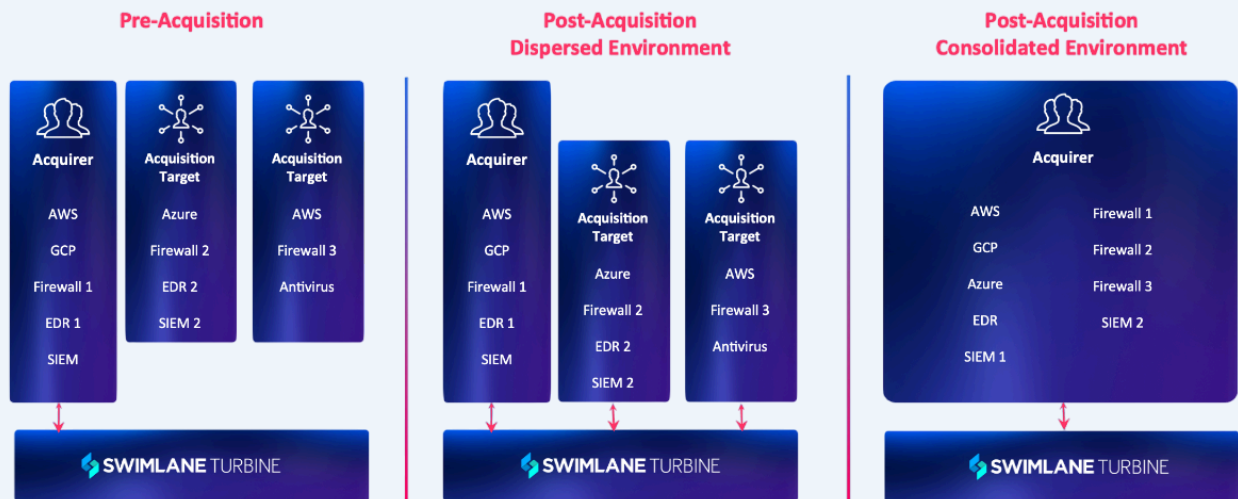

## Cybersecurity Due Diligence & Post-Deal Integration

Just as CEOs perform due diligence as a phase in the M&A process, so should CISOs. Cybersecurity due diligence should consider mechanisms for integrating technology, operational processes, and merging teams. Organizations that use Swimlane Turbine as part of their M&A cybersecurity strategy can speed integrations, ensure that SecOps processes are institutionalized with new teams, and intelligently prioritize vulnerabilities or incidents during a high-risk time.

# Swimlane Turbine: AI Automation for Any Environment

Swimlane Turbine is the world's most scalable and fast AI automation platform. It can integrate with any API to ingest data at cloud-scale and execute upwards of 25 million actions per day for a single customer. Global enterprises can secure growth and streamline SecOps across dispersed or complex consolidated environments with Turbine.

## Swimlane Turbine for Mergers & Acquisitions

## Get Started with Swimlane Turbine

Turbine can be deployed in the cloud, on-prem, or air-gapped environments. All it takes is one day to get up and running with Turbine in the cloud, with full use case implementation completed in two weeks or less.

At Swimlane, we believe the convergence of agentic AI and automation can solve the most challenging security, compliance and IT/OT operations problems. With Swimlane, enterprises and MSSPs benefit from the world's first and only hyperautomation platform for every security function. Only Swimlane gives you the scale and flexibility to build your own hyperautomation applications to unify security teams, tools and telemetry ensuring today's SecOps are always a step ahead of tomorrow's threats.
