

# The AI-Enabled Security Automation Platform

Swimlane Turbine is the Triple Threat of Automation, AI, and Low-Code Needed to Solve the Most Challenging SecOps Problems

## Swimlane Turbine Redefines SecOps

Swimlane Turbine is the world's fastest and most scalable security automation platform. Only Turbine can execute 25 million daily actions, 10 times faster than any other platform, provider, or technology. The cloud-native low-code security automation platform is built with the future of SecOps in mind. It is the only security automation platform that can adapt to constantly evolving environments, and exceed the modern security operations centers' (SOCs) pace of change.

**240%**

### Return on Investment

Fast & seamless implementation maximizes first-year ROI.

**1 Day**

### Time To Value

It only takes 1 day to be up and running with Swimlane Turbine.

**10X**

### Faster Automation

Swimlane Turbine is the world's fastest and most scalable security automation platform

## Automate Any Use Cases in & Beyond the SOC

No two organizations have the same internal processes, data sources, team structure or resources. From fundamental operational tasks to industry-specific applications, automate any use cases in and beyond the SOC leveraging pre-built ecosystem-agnostic automation solutions with highly-composable applications that every SecOps team needs.

In the SOC	Beyond The SOC
<ul style="list-style-type: none"><li>• Phishing</li><li>• SIEM Alert Triage</li><li>• EDR Alert Triage</li><li>• Incident Response</li><li>• Threat Hunting</li></ul>	<ul style="list-style-type: none"><li>• Employee On/Offboarding</li><li>• Insider Threat</li><li>• Fraud Prevention</li><li>• Physical Security</li><li>• Third-Party Risk Management</li></ul>

# What Makes Turbine Different

## Low-Code Canvas

Modular and reusable components that provide a human-centric approach and unprecedented visibility.

## Autonomous Integrations

An ecosystem-agnostic integration network that offers infinite integrations with any REST API, without requiring developer resources.

## Active Sensing Fabric

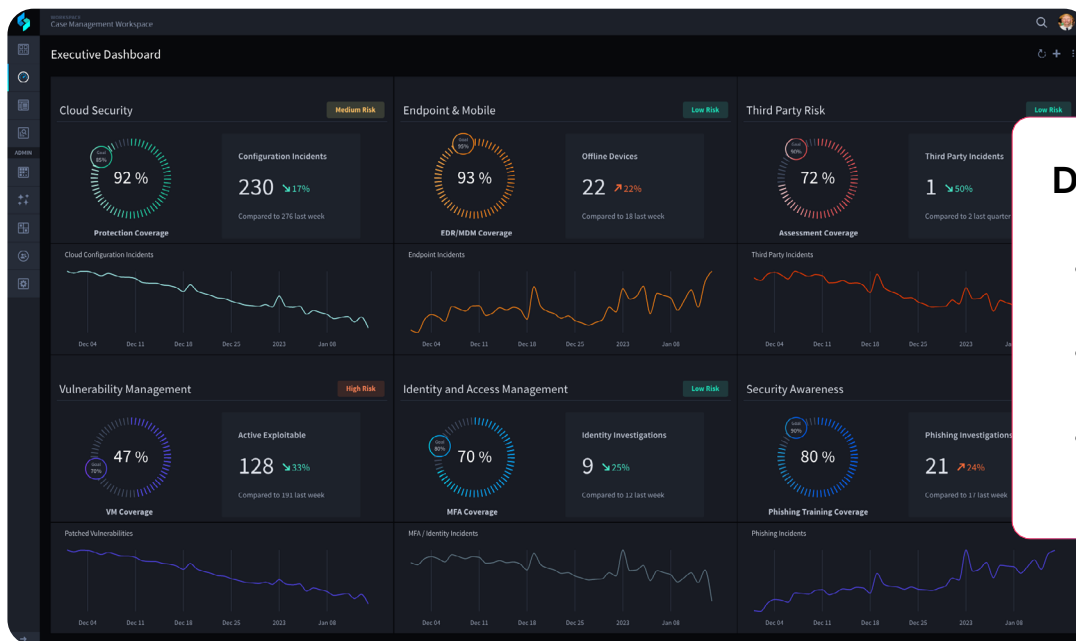

Turbine's Active Sensing Fabric gathers and acts on near real-time attacks through big-data ingestion, pre-processing, and inline enrichment.

## Hero AI

A collection of AI-enabled innovations including a private Large Language Model (LLM), Crafted AI Prompts, Case Summarization, a comprehensive assistant for instant generation of complex Python, and more.

## Business Intelligence Applications

Robust case management, low-code dashboards, and customizable reporting features combine human and machine data to serve as a system of record for security teams.

## Deployment Options

- Cloud
- On-Prem
- Air Gapped

Swimlane is the leader in AI-enabled, low-code security automation. Swimlane unifies security operations in-and-beyond the SOC into a single system of record to reduce process and data fatigue while quantifying business value and security effectiveness. The cloud-scale Turbine platform combines human and machine data into actionable intelligence for security leaders. For more information, visit [swimlane.com](https://swimlane.com)
