

Swimlane AI SOC

Your glass-box AI SOC where every decision is explainable and every action is auditable.

The Swimlane AI SOC with intelligent deep agents provides a virtual workforce that handles investigation and response while maintaining the transparency and control enterprises and global MSSPs demand.

Orchestrate Your AI SOC with Power and Control

Maintain Complete Control

Review, modify and re-build AI generated plans and playbooks.

Apply Organizational Context

Tailor the AI SOC to your unique environment for trustworthy AI at scale.

Ensure Trust & Transparency

Unlike black-box solutions, we ensure every decision and action is auditable.

The Hero Behind Your Glass-Box AI SOC

- ✓ Deploy a fleet of pre-built expert AI agents designed to augment specific skills.
- ✓ Create or edit your own expert agent in our no-code AI automation studio.
- ✓ Leverage deep agents for complex and difficult tasks with full transparency and control.

Intelligent Deep Agents within AI SOC

Investigation and Response Agent

Speeds investigation and response by leveraging identifiable threats, past investigations and knowledge base articles to plan and generate executable playbooks for optional human review.

Playbook Generator Agent

Simplifies playbook creation and lowers the barrier to entry by enabling users of all skill levels to create or modify playbooks with natural-language prompts.

Ingestion Agent

Integrates with any ingestion source on the fly, ensuring your AI SOC implementation is ecosystem-agnostic without the burden of building or maintaining integrations.

The Foundation That Makes Swimlane AI SOC Unmatched

Swimlane AI SOC serves as a system of action for all AI and human decisions. Built on a decade of engineering investment, only the AI SOC, powered by Swimlane Turbine, has the foundation to ingest data at scale and the mechanism to take action from a centralized workbench.

AI SOC is powered by a full-featured agentic AI automation platform offering comprehensive capabilities.

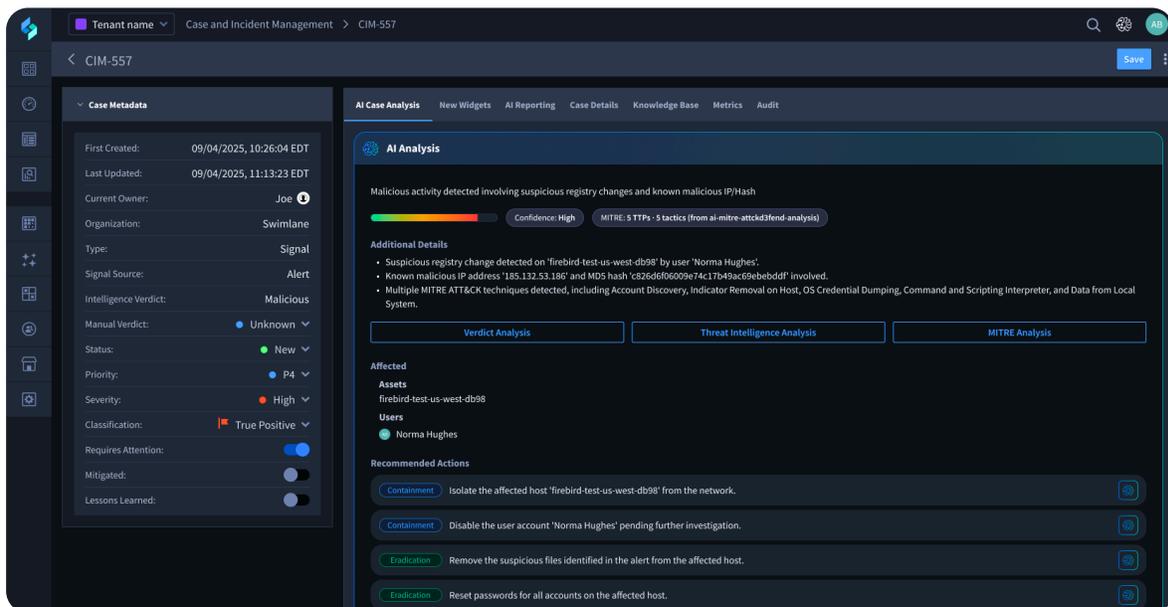

Swimlane Marketplace: Thousands of AI automation building blocks, including AI agents, infinite integrations, and the industry's most comprehensive library of pre-built playbooks and outcome-oriented solutions.

Fleet of AI Agents: Expert agents built for specific and specialized skills with the ability to intercommunicate.

AI-Driven Case Management: A unified workbench where all AI and human decisions become actionable reasoning converge.

AI Automation Studio: Simplified tools for building playbooks, agents and full-stack applications, integrations, and reporting.

Dashboards and Reporting: Flexible dashboards for instant visibility into critical KPIs and AI-augmented reporting to keep CISOs and stakeholders informed.
